

EP.N5150

Active Network Control Panel

Features

- Support Single Door / 2 Doors
- Support Car Park Mode
- Support Dynamic Reader Location
- Compatible with Various Reader Technologies
- ActiveTransmit & ActiveDownload
- Peer To Peer Global Anti-Passback
- Configurable Digital / Supervised inputs (4)
- Quick Terminal Plug-in Connectors
- Firmware Upgrade via Server
- Reader Output Control
- Onboard & Cross-Board Door Interlocking
- Dynamic Operation Profile
- Support 5,000 Users and 10,000 Events Memory

High Performance

Based on the latest HCB (Hybrid Compact Board), N5150 is a high reliability, high efficiency and highly integrated intelligent multi-application control panel targeted for physical access control industry. It features a 32bits Freescale ColdFire microcontroller running at 60MHz, this control panel can fulfill most demanding requirement in physical access control environment.

Active Transmit

Rather than keeping the event data in the memory awaiting for host-PC to poll, controller will actively transmits the current event data to the host server as it happens, meaning events get delivered and can be act upon faster.

Built In Web Server

Built-in web server where network configuration such as IP address, subnet mask, server IP can be easily done upon login. No more factory programming needed as the firmware can be upgraded via the on-board web server.

AES

AES (Advance Encryption Standard)

By enabling AES Encryption, the controller will only communicate with platform1 where the AES key in the P1 database is match with the controller. This can avoid hacker to tap the controller then directly communicate and control the controller, for example send a pulse door command to unlock the door.

Door Interlocking

2 In doors interlocking within the control panel, no external wiring is needed. Cross-board interlocking is achievable by checking the interlocking signal coming from second control panel before granting the accessibility to the local control panel.

EP.N5150

Active Network Control Panel

Technical Specification

Dimension	158mm (W) x 90mm (H)		
MCU	32bits @ 60MHz		
Memory	256K Flash Memory	32K SRAM (Buffer)	64Mbits Non-Volatile SPI Flash Memory (Storage)
Operating Temperature	0 °C to 40 °C		
Card Holder	5,000		
Event Transaction	10,000Max.		
Access Level	255 Sets		
Digital/Supervise Inputs	Max 4, User configurable (Door Sensor/Request-To-Exit/Fire Input/General Purpose)		
Digital Output	Max. 2 Dry contact Relay		
Reader Communication Port	Wiegand / OSDP		
Network Communication Port	RJ-45 Self-Negotiate 10/100mbps		
Power Protection	Resettable Fuse - 2.5A		
Surge Protection	TVS - Up to 15KVA		
Onboard LED Control	Power / Communication / LAN / Event / Error		
AC Fail Monitoring	Yes		
Battery Monitoring	Yes (Firmware threshold control to shutdown control panel)		
External Short Circuit Protection	At readers		
On Board Battery	Apply to RTC only

Ordering Information

EP.N5150.PSU

Entrypass 2-Reader Active Network Control Panel
c/w 4 Supervised Input and 2 Dry Contact Relay Output and PSU with casing.

EP.N5150.PCB

Entrypass 2-Reader Active Network Control Panel
c/w 4 Supervised Input and 2 Dry Contact Relay Output, PCB only.
