Rechargeable Lithium
Battery

Low-Battery Warning

Next-generation AI built for smart locks

Only very few companies in the lock market develops and owns AI technologies, and fewer can bridge them with useful, user-friendly products through extensive real-life testing. EZVIZ is one of them.

***Algorithm** that leads*

EZVIZ AI 3D modeling & recognition 3.0 that optimizes speed, accuracy, and adaptability

***Security** that endures*

Strict data protection and end-to-end encryption, with **fully localized processing of facial recognition data**

***Hardware** that excels*

Built-in 12 nm high performance AI chip and **dual-core CPU** design that drive unmatched high performance

***Intelligence** that enhances*

Supports **over-the-air software updates** to your lock smart over time with longer product lifecycle

State-of-the-art AI for convenience & security

≤ 1 second unlocking time³
for instant response & ultra-smooth experience

$\leq 0.0001\%$ false acceptance rate⁴
to ensure extremely high level of security while
being fast in recognition

$\leq 0.1\%$ false rejection rate⁵
to greatly reduce frustration caused
by repetitive verification

Much better than your ordinary facial recognition lock

Just approach as you arrive –
it's that easy to unlock

Better AI means less hassle and less waiting.
Now, you don't have to move your head,
adjust the angle of your face or put on
a typical smile before the lock recognizes you.

Despite hairstyle & makeup

Sees through glasses & beards

Dim hallway

Strong backlight

**Ready for every moment,
despite lighting conditions**

With EZVIZ's advanced video technology,
the Y3000FVP Plus doesn't compromise
its performance, even if you arrive home late.

**Tirelessly protects,
with security at its core**

Security is the cornerstone of a good lock.
We build the Y3000FVP Plus with multiple
technologies to ensure you both your home
and your data are well protected.

**Can't be fooled by photos, videos,
3D masks or statues**

**Localized 3D data processing without
real-life**

Plam vein unlocking that adapts more

With the Y3000FVP Plus, everyone can unlock with confidence with plenty of options. In addition to 3D faces, users create unique, safe access with their hands, without pressing hard on a fingerprint sensor.

**Less constraints
from face coverings**

**Less restriction
on users' height**

**Less worries
on worn fingerprints**

More ways to enter for tailored convenience

Your household can be busy with comes and goes, and you may not always be there to welcome the ones you trust. Choose what's convenient for your family and visitors, while keeping your front door under your watch.

Why you want your lock to be more than a lock

Users expect more from a smart lock because their struggle with some difficult times, which requires flexibility, security, and convenience beyond just opening a door.

One multi-purpose product offers total

Here's what Y3000FVP Plus offers

Much better than your old peephole

See more with a wide-angle view

The smart lock features a built-in camera that delivers a clear, wide-angle view of your doorstep.

Ultra-Wide 150°
Field-of-View

Two-Way Talk
with Voice Changer

150°
Field-of-View

Check visitors with the indoor

The indoor screen helps everyone, from kids to grandparents, see who's at the door

Crisp Video Clarity

4-Inch Color Screen

Active and smart as a security guard

Thanks to EZVIZ's smart visual technology, your lock knows when someone's near, or hanging around. It detects human movement by your door and sends instant alerts, keeping you in the know, day and night.

**5.8 G Radar
Human**

**IR Night Vision
(Up to 2 m)**

**Detection Video Replay
(Built-in 8 GB memory)**

Security you can trust in every part

Extra peace of mind, all at your fingertips

Instant notifications on attempted unlocking

Low-battery warning

Real-time detection alerts on people who linger

Anti-tamper alarm

Lock status & activity log check

* For illustration purposes only.

Stand strong and protect always

Designed to endure real-world conditions, the smart lock passes rigorous testing for weather resistance, long-term use, and electrical safety, delivering reliable protection you can count on.

*Our global certifications in the fields of **information security, privacy information security, and cloud security***

- 1 Please note that the palm vein scanning area does not include fingers. When using the palm vein unlocking function, please place only the palm part on the scanner. The optimal palm vein scanning distance ranges from 15 cm to 25 cm for adults, with a recommended distance of 10 cm for children. These distances may vary depending on environmental conditions, such as strong sunlight.
- 2 The biometric recognition technology in Y3000FVP Plus operates ENTIRELY LOCALLY on the product that you control and manage yourself, and only serves the sole purpose of supporting your decision of unlocking. During the whole course, the saved data always only contains technical value, i.e. the biometric data obtained from the templates you proactively provided in advance (such as facial images, palm vein template), which cannot be used to reconstruct your original data.
- 3 Data from EZVIZ Lab's testing results based on standard conditions. The actual recognition speed may vary due to environmental factors.
- 4 Data from EZVIZ Lab's testing results based on standard conditions. The actual false acceptance rate may vary due to various objective factors, such as heavy makeup or strong sunlight exposure.
- 5 Data from EZVIZ Lab's testing results based on standard conditions. The actual false rejection rate may vary due to various objective factors, such as heavy makeup or strong sunlight exposure.
- 6 The human presence sensing feature uses the built-in radar sensor and does not involve the detection of human faces. You can choose to activate or deactivate this function on the EZVIZ App.
- 7 When being connected via Bluetooth with the Wi-Fi mode disabled, the lock can run up to 4 months with fully charged batteries based on the usage of 10 openings per day. When the lock is connected via Wi-Fi, its battery life may reduce due to internet activities, and the actual use may vary due to the network stability or other environmental factors.

Specifications

CS-Y3000FVP Plus

Material and Sepcification

Panel Material	Aluminum alloy
Panel Size	Front panel: 400 × 73.7 × 53.44 mm Rear panel: 400 × 72 × 30.5 mm
Color	Metallic grey
Lock Body Type	Automatic mechanical detection lock body 5085 / 6068
Lock Cylinder	C-level cylinder
Emergency Charging	Type-C
Working Power	5,000 mAh rechargeable lithium batteries

Technical Specification

Unlocking Method	Face ID, Fingerprint, Passcode, Mechanical key, Bluetooth key via EZVIZ App, Temporary codes, Remote unlocking
User Capacity	50 pcs
Face ID Capacity	50 pcs
Palm Vein Capacity	50 pcs
Fingerprint Capacity	50 sets
Passcode Capacity	50 pcs
Communication Methods	2.4 GHz Wi-Fi, Bluetooth
Screen (non-touch)	IPS 4-inch (480 × 800)
IP Grade	IP52
Front Panel Camera Resolution	1080p (1080 × 1960)
Front Panel Camera Lens	View angle: 70° (Horizontal), 126° (Vertical), 150°(Diagonal)

IR Night Vision Distance	2m
Storage	EMMC 8G; Supports EZVIZ CloudPlay storage
Face Recognition	Standing distance < 1 m, height greater than 1.2 m and less than 2 m Recognition speed ≤ 1 s, supports day / night recognition Supports recognition across varying hairstyle and with glasses * EZVIZ laboratory data
Palm Vein Recognition	Recognition distance between the palm vein and sensor: 15 ~ 25 cm * EZVIZ laboratory data
Software Function	Anti-peeping code, Low battery warning, Privacy mode, User management, Real time notification, Anti-test locking, Anti-tamper alarm, Remote control, Video calling, Voice changer, Wandering detection
Voice Control	Supports Google Assistant and Amazon Alexa (Supports OTA updates)
Supported Door Thickness	6068: 40 ~ 120 mm; 5085: 40 ~ 100 mm
Working Temperature	-20°C ~ 60°C
Operating Humidity	10% ~ 95%
