## Slim And Simple Design

- Metal die-cast model with panels as thin as 18.8mm
- Ergonomic edges and corners bring a smooth feel, and the flow of light and shadow on the lock panel brings aesthetics
- The details are meticulous everywhere, and the lines and arcs complement each other

18.8MM

## Automation | Convenience

- The patented mechatronics fully automatic mortise lock reconstructs the core components of the smart lock
- One-touch Unlocking | The locked door automatically pops up, making it more convenient and easier to open the door

tenon

## Anti-peep Unlock | More Secure

Before the user enters the PIN code, the user is guided to push two random numbers to prevent the password from being seen by anyone nearby by inferring the fingerprint on the frequently pushed number.
